HURST NITRO STICK 2 - WIRING DIAGRAM

Fits: All Hurst manual shifters

1. For maximum safety, perform this installation on a clean, level surface with engine turned off. Chock wheels to prevent vehicle movement in either direction.

Disconnect negative terminal from the battery before any electrical work.

ILLUMINATING SWITCH: can be used for multiple applications i.e. Nitrous, Line-Lock, Roll Control, etc.

2. Strip insulation to see inner conductor material color.

3. **INSPECT!** After wiring the switch to the device, make sure wires are properly insulated to prevent short(s).
